

# Knee & Hip Solutions National Training Lab

October 2-3, 2020 | Boston, MA

Join us October 2-3, 2020 for our iTotal Identity Knee and Conformis Hip Solutions - National Training Lab in Boston, MA where you will learn how our next generation Identity knee platform and the Conformis Hip System are changing the way surgeons perform total joint arthroplasty.

**NEW! Virtual Livestream Platform:** Due to the uncertainty in travel and safety guidelines associated with COVID-19 in various regions of the country, we will also be offering a digital format for those who are interested in viewing the program but are not able to attend in person. You may make this selection during the registration process and modify to digital attendance at any time.

As a surgeon, you can expect the following value:

- An introduction to our next generation iTotal<sup>®</sup> Identity knee, currently available on our cruciate-retaining platform
- Comprehensive overview of the Conformis Image-to-Implant technology for patient-specific TKA and THA
- Gain insight into the implant design process, customization capabilities, and patient selection criteria
- Detailed look into our custom iView surgical plan, and understanding how it is best utilized to guide your preoperative and intraoperative decisions
- Hands-on cadaveric training with Conformis patient-specific iLigs & implants
- In-depth clinical discussion with your proctors and peers
